DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Dodart (U.S. Patent No. 5,532,659) discloses a connection for a high-frequency connection of a semi-rigid coaxial cable (1) provided with a single-core inner conductor (10), an adapter fastener (2), which is intended for both an adapter connection and a circuit board connection, the adapter fastener (2) being electrically conductive, wherein the adapter fastener (2) comprises a hole (23) which extends through the adapter fastener (2) and to which the coaxial cable (1) is fixed; wherein the sheath (11) of the coaxial cable (1) is electrically connected to the adapter fastener (2) and a male connection is formed at the adapter fastener (2) by means of the inner conductor (10) of the coaxial cable (1). See Figs. 1-3.

Pope (U.S. Patent No. 4,996,478) discloses a connection for a high-frequency connection of a coaxial connector (34), an adapter fastener (100), which is intended for both an adapter connection and a circuit board connection, the adapter fastener (100) being electrically conductive, wherein the adapter fastener (100) comprises a hole (102) which extends through the adapter fastener (100) and to which the coaxial connector (34) is fixed. See Figs. 1-5.

Voelcker (U.S. Patent No. 3,201,721) discloses a connection for a high-frequency connection of a semi-rigid coaxial cable (11) provided with a single-core inner conductor (13), an adapter fastener (24), which is intended for both an adapter connection and a circuit board connection, the adapter fastener (24) being electrically conductive, wherein the adapter fastener (24) comprises a hole (34) which extends through the adapter fastener (24) and to which the coaxial cable (11) is fixed. See Figs. 1-2.

However, the references fail to teach, disclose, or suggest, either alone or in combination, the adapter male connection being connected to a female connection of a standardized adapter by connecting the inner conductor of the coaxial cable electrically to a female contact of the standardized adapter and by connecting the adapter fastener electrically by means of adapter protrusions to the frame of the standardized adapter, and the adapter fastener being fastened by means of circuit board protrusions to a circuit board and the adapter fastener is connected electrically by means of the circuit board protrusions to the earth of the circuit board.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Logan (U.S. Patent No. 3,539,966), Kan (U.S. Patent No. 6,407,652), Cartier et al. (U.S. Patent No. 6,639,154), Evans (U.S. Patent No. 6,575,762), and Hosler, Sr. (U.S. Patent No. 5,897,384) disclose coaxial connections having fasteners, adapters and cables.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edwin A. León whose telephone number is (571) 272-2008. The examiner can normally be reached on Monday - Friday 10:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on 571-272-2800, extension 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
